EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations, which apply in relation to England, amend the National Health Service (Functions of Strategic Health Authorities and Primary Care Trusts and Administration Arrangements) (England) Regulations 2002 (“the principal Regulations”).

Regulation 2 substitutes a new Schedule 5 to the principal Regulations. Schedule 5 lists the specialised services whose provision is to be secured in England by Strategic Health Authorities, rather than Primary Care Trusts. The revised list adds new services that Strategic Health Authorities may commission.

The new services are—

- Adult ataxia telangiectasia service (item 1)
- Alkaptonuria service (item 2)
- Beckwith-Wiedemann syndrome with macroglossia service (item 9)
- Behçet’s syndrome service (item 10)
- Breast radiotherapy injury rehabilitation service (item 11)
- Ex-vivo partial nephrectomy service (item 29)
- Primary ciliary dyskinesia - management service (item 47)
- Severe acute porphyria service (item 57).

The revised list also amends the description of some existing services so as to reflect more accurately the descriptions now used within the health service in England. The amended references are items 6, 15, 35, 46 and 67.

A full impact assessment has not been produced for this instrument as no impact on the private or voluntary sectors is foreseen.
